

Handout 11: Interpret a slope and intercept

```
coef(lm(wages~I(age-18), data=earnings))
```

```
## (Intercept) I(age - 18)
```

```
##    17.920207    0.278255
```

Interpret the slope in a single sentence:

Interpret the intercept in a single sentence:

Name (Print and Sign): _____
